² The enterprise's property has been appropriated and incorporated into the Morye shipyard

³ Also, in August 2014, the JSC Zelenodolsk O. M. Gorky Plant in a raid attack unlawfully seized the property of the Kerch Shipyard Zaliv where it since has been building a lot of warships for the Russian Navy. As Zaliv Shipyard had not been a part of the Ukroboronprom concern, it will become a subject of our upcoming publications.
